

FCC,

I am urging you to reject the NAB's request to stop XM Radio from providing Instant traffice and weather updates. This is a subscription based service paid for by me, so I can't understand why the NAB would try to limit what I can listen to in the privacy of my car. The stations members of the NAB should be able to continue receiving traffic and weather updates free of charge over-the-air, but as a paid subscriber to XM Radio, I should not have my content censored.
